

Schedule of Certification

Assessed for the United Kingdom Digital Identity & Attributes Trust Framework

Reference Number: 2022/05/SCH5

Issue Date: 7th September 2022

This is a Schedule of Certification independently assessed by competent and qualified audit professionals to demonstrate that Credas Technologies Ltd, as an Identity Service Provider, meet the relevant requirements of the United Kingdom Digital Identity & Attributes Trust Framework.

The Schedule is only valid when presented alongside Certificate of Conformity UKDIATF 2022/05.

Credas Technologies Ltd ACCS /DISC certificate of conformance

Statements of Scope

Scope Statement for ACCS/DISC certificate of conformance		Identity Verification Services to establish official identity for digital use, in accordance with the United Kingdom Digital Identity & Attributes Trust Framework published by the Department of Culture, Media and Sport on the gov.uk and as more particularly specified below:	
24/07/2022	Agreed Identity Profiles	M1C	As described in the 'Identity profiles' set out in the annex to "Good Practice Guide (GPG 45) – How to prove and verify someone's identity – version 5.1", as published by Cabinet Office and the Government Digital Service on the gov.uk website and updated on 11 Feb 2021.
07/09/2022	Extension of Scope	M1A L1B	As described in the 'Identity profiles' set out in the annex to "Good Practice Guide (GPG 45) – How to prove and verify someone's identity – version 5.1", as published by Cabinet Office and the Government Digital Service on the gov.uk website and updated on 11 Feb 2021.
	Reusability	For single use	
Additional Requirements Satisfied	Right to Work	An application for which digital identities provided by this company can be used, specifically the checking of an individual's right to work in the UK in accordance with "Employer right to work checks supporting guidance", a document published by the Home Office on the gov.uk website on 17 January 22

A Digital Identity

Systems Certification

the UK in accordance with “Landlord’s guide to right to rent checks”, a document published by the Home Office on 9 February 22

Certified Version

In accordance with Credas system configuration statement v1.0.

Notes

NOTE 1 –

An extension to certified scope to the identity profiles L1B & M1A. Credas is already certified under M1C profile for single use process. This is for the agreed end use of Right to Rent and Right to Work checks.

1. Credas will use the M1C profile in the work it currently carries out in the property sector, where they maintain that the use of this method of identity proofing is already well accepted, even though there is no formal ‘property’ end use agreed under UKDIATF.
2. Credas is NOT certified to use the M1C profile for the Disclosure and Barring services end-uses for lack of a fall-back profile in case an individual cannot, or does not wish to, use the M1C profile).

Endorsements & Limits of Jurisdiction

Applicable only in the jurisdiction of the United Kingdom of Great Britain & Northern Ireland.

Simple Explainer

We provide this ‘simple explainer’ for anyone reading or interpreting our certificates of conformity to assist with understanding. There is further information on our website www.accscheme.com or by calling our certification team on **0345 257 0018**.

The United Kingdom Digital Identity and Attributes Trust Framework aims to make it easier and more secure for people to use services that enable them to prove who they are or something about themselves. It is a set of rules for organisations to follow if they want to provide secure and trustworthy digital identity and/or attribute solutions.

In the context of this trust framework, a digital identity is a digital representation of a person acting as an individual or as a representative of an organisation. It enables them to prove who they are during interactions and transactions. They can use it online or in person. Services and organisations that let users use secure digital identities can better trust that those users are who they say they are.

Trust framework participants are be certified against a set of UK government-approved rules. This means that one organisation can trust that the information another shares with them is accurate and reliable. To meet the rules of the trust framework, a certified provider will need to prove they are able to safely manage users’ digital identities or attributes.

This Schedule of Conformity sets out what this trust framework provider has been assessed against and the types of identity profiles that the organisation is certified to provide and for which purpose(s).

For more information about the framework, search gov.uk for ‘Digital ID Trust Framework’.
